Introduction

This book presents a collection of my best chess games I ever played.

I found only 7 so far but I am still checking and hopefully can add more in the upcoming tournaments to reach the 60!

Grenke Freestyle Open A, Karlsruhe

2025.04.20 · Round 6 · Freestyle - Position 380

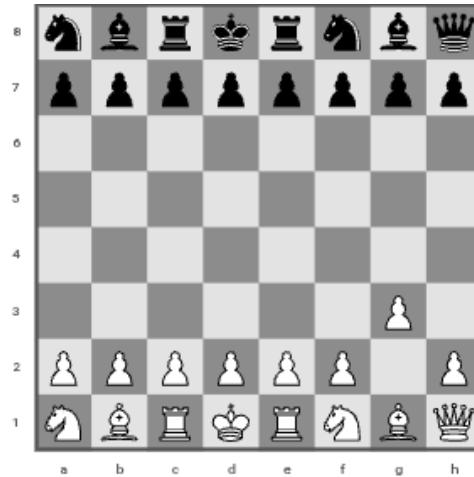

My first Freestyle Chess tournament and in the same group as Magnus Carlsen who scored a phantastic 9/9! I liked it very much, no preparation and you are on your own from move one. Ok, you can look left and right what the others are doing...

1. g4=+ as I said: fun from move one!

After 1. g4=+

(better was 1. g3 to restrict the black bishop on b8.)

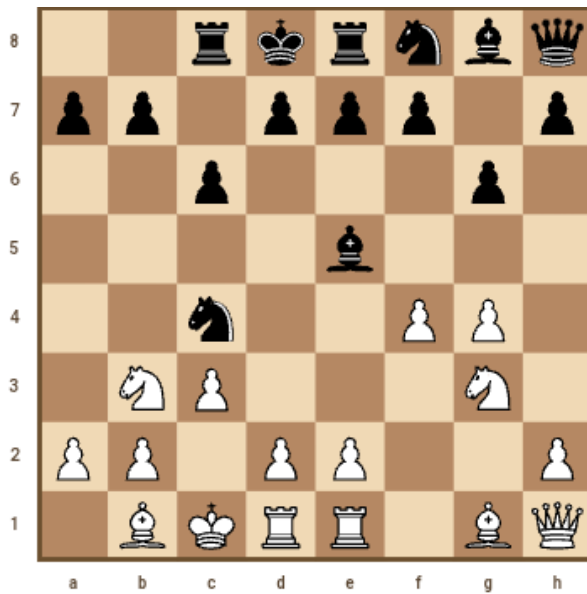

After 1. g3

1... c6 2. ♘g3 ♘b6 3. ♘b3 ♘c4 4. O-O-O g6 5. c3 ♙e5 too ambitious

After 5... ♙e5

6. f4? nice idea but unnecessary

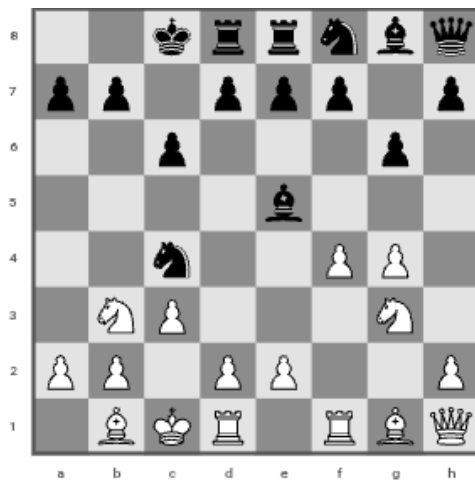

After 6. f4?

(normal moves secure an advantage 6. ♖f1
O-O-O 7. f4+=)

After 7. ♗xa7

(better get rid of the ♗f4 with 7. ♜e4 ♗xg3
8. hxg3=)

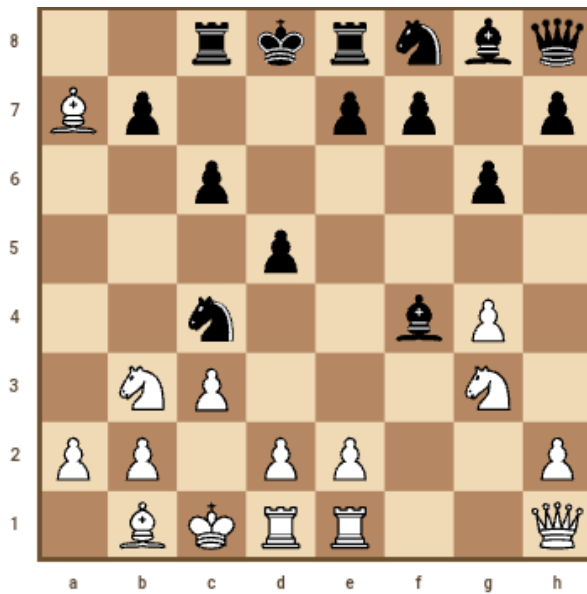

After 7. f4+=

6... ♗xf4 7. ♗xa7 opening the a-file for
Black?

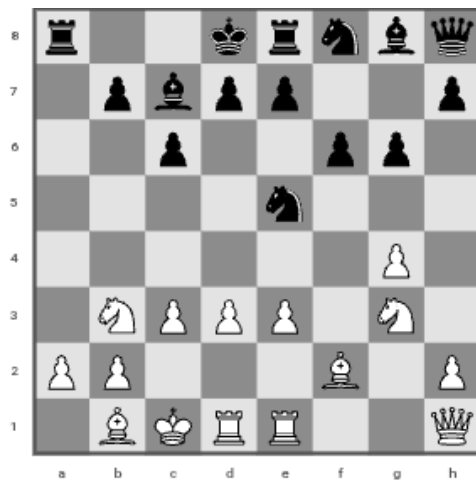

After 8. hxg3=

7... d5? offers White a target to attack

After 7... d5?

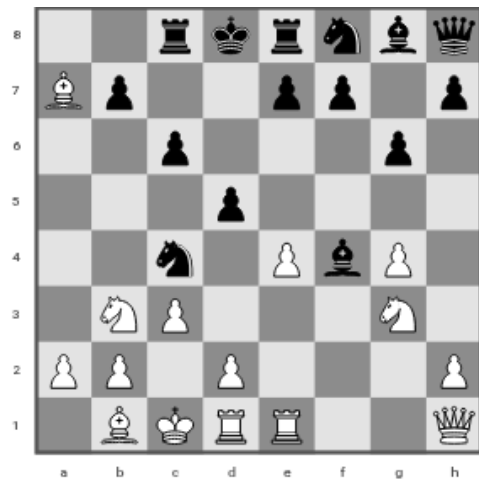

(Back has nice play after 7... ♖a8 8. ♙f2 f6
9. e3 ♙c7 10. d3 ♘e5=+)

After 10... ♘e5=+

8. ♙g1

(8. e4+/- would have been the logic reply)

After 8. e4+/-

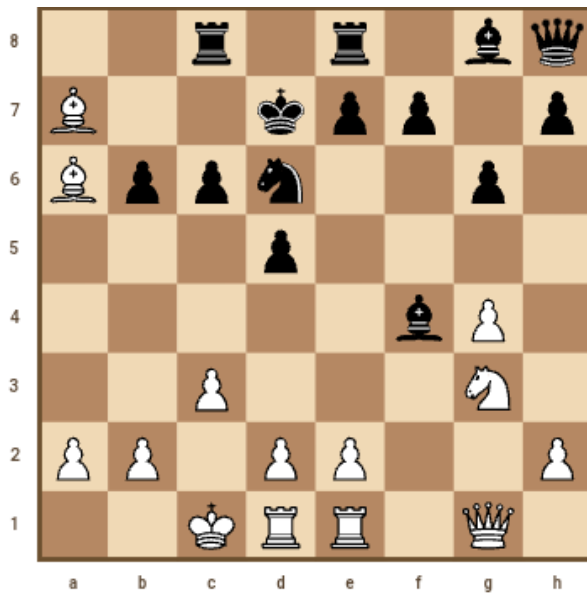

8... ♘d7 9. ♙c5 b6 10. ♙xd7 ♙xd7 11.
♙d3 ♘d6? +1.48

After 11... ♘d6?

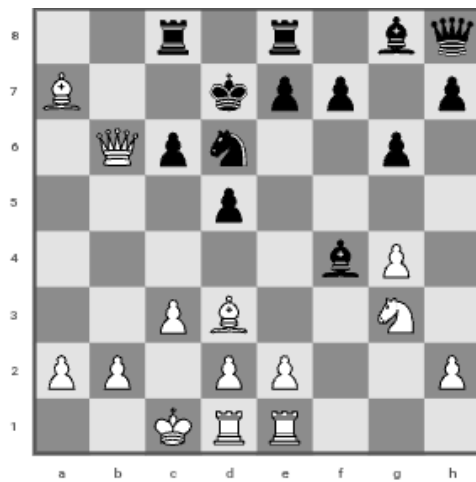

(-0.31: 11... ♙e5 12. ♙xc4 dxc4 13. ♙xb6 f6
14. ♙f1 ♙a8)

12. ♙a6? allows counterplay

After 12. ♖a6?

(the straightforward 12. ♖xb6 was necessary

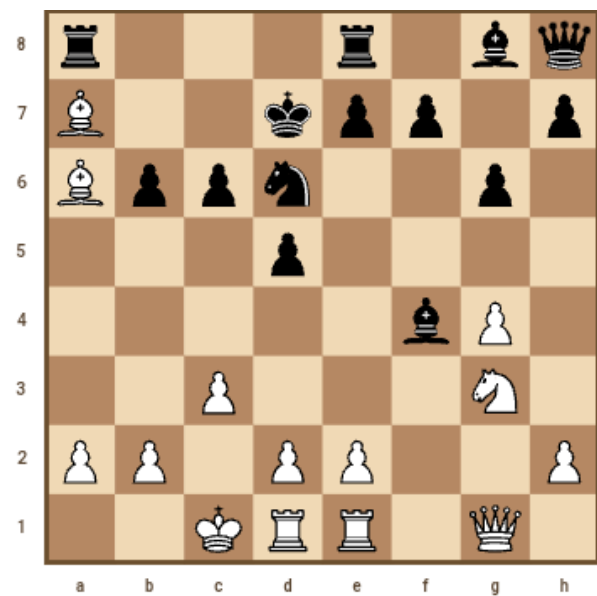

After 12. ♖xb6

f6 13. ♖a6 ♖e6 14. ♖xc8+ ♖xc8+/-)

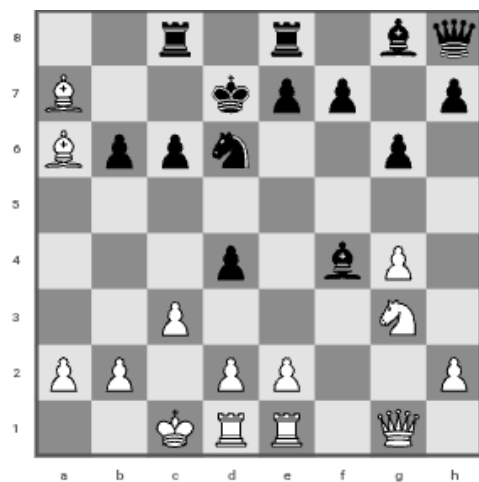

After 14... ♖xc8+/-

12... ♖a8? overlooked his chance

♗xc8-/+

After 13... ♗xc8-/+

) 13... dxc3 14. ♗d4 cxd2+ 15. ♖xd2 ♗xd2+ 16. ♔xd2 f6 17. ♗xc8+ ♖xc8=)

After 17... ♖xc8=

13. ♖xb6+/-

After 13. ♖xb6+/-

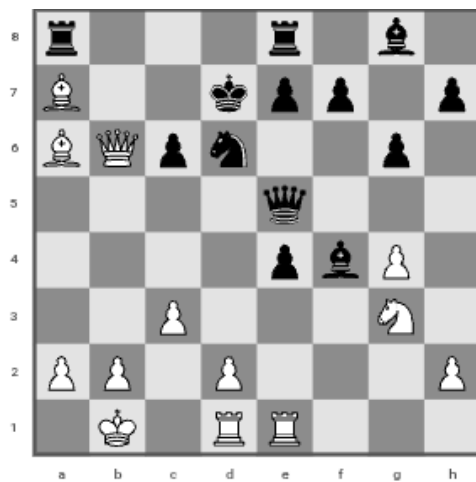

13... f6? frees the ♗g8

After 13... f6?

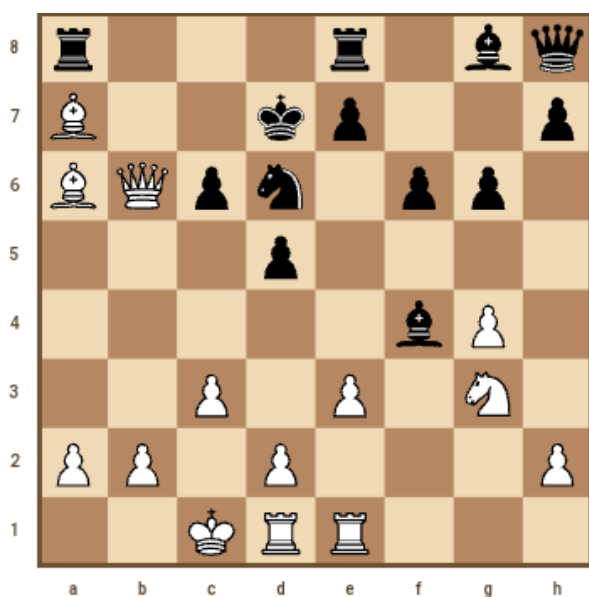

(but much better was to free the queen 13...

♖e5 14. e4 dxe4 15. ♔b1+/-)

After 15. ♔b1+/-

14. e3+/-

After 14. e3+/-

14... ♕e5 15. d4 ♘c4 16. ♖b7+ ♕c7 17.
 ♕xc4 ♖eb8 18. ♕xb8 ♖xb8 19. ♖a7 dxc4

5. d4 cxd4 6. exd4 d5 7. cxd5 ♘xd5 8. ♚b3
♘xc3 9. ♙c4! I had the impression my
better-rated opponent wanted to avoid theory
and outplay me positionally. But we are still
deep within my repertoire.

After 9. ♙c4!

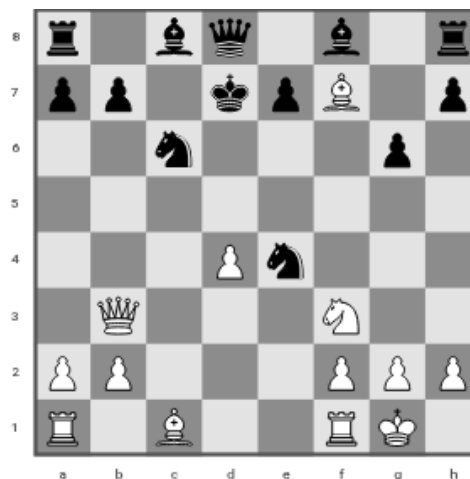

9... e6

(9... ♘e4??

After 9... ♘e4??

10. ♙xf7+ ♚d7 11. O-O+- black's position is
hopeless, e.g.:

After 11. O-O+-

♘d6 12. d5 ♘xf7 13. dxc6+)

10. ♙d3 ♚c7 11. O-O ♙e7

(12... ♘a5 looks more logical

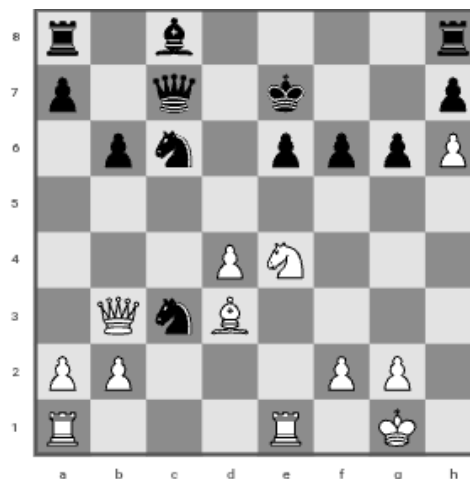

After 12... ♖a5

12. ♖h6 ♖f8 13. ♖xf8 ♔xf8 14. h4 ♔g7

15. ♖fe1 b6 16. h5 f6 is more resistant

After 23. ♖e4+-

b3 d6 12. ♙b2+= more or less all preparation.
White has very comfortable play.

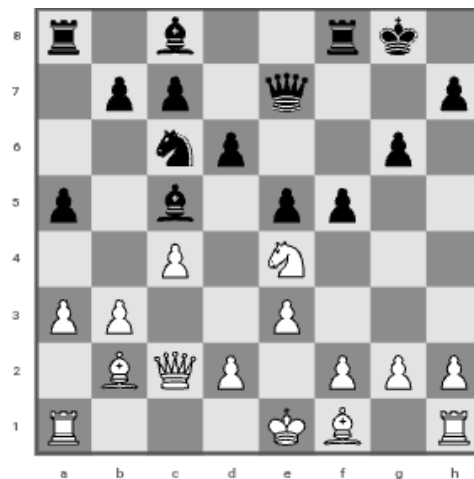

After 12. ♙b2+=

12... ♙b6 not necessary because trading the white knight against the black bishop doesn't improve anything for white.

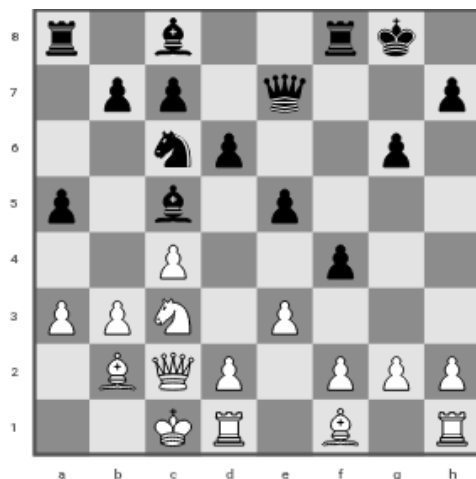

After 12... ♙b6

(12... f5 the more straightforward and better continuation)

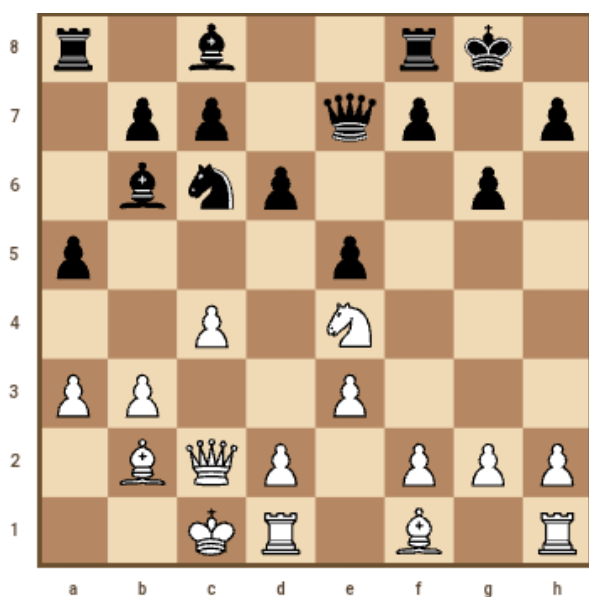

After 12... f5

After 14. O-O-O+=

13. O-O-O+/-

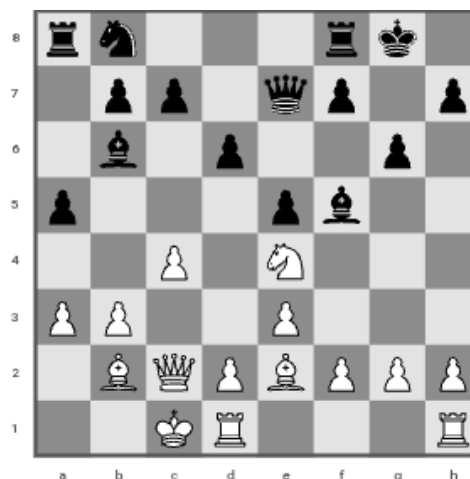

After 13. O-O-O+/-

13... ♖f5 14. ♖e2 ♗ad8?! "normal" moves are already critical.

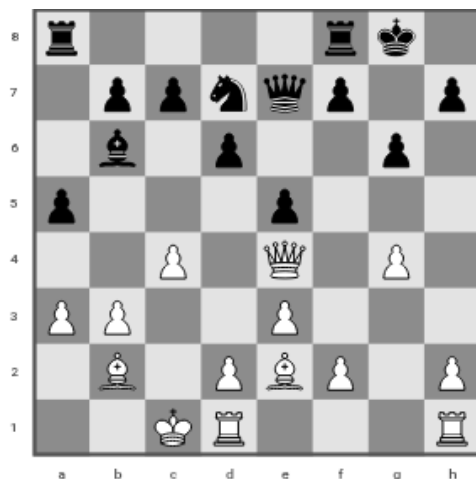

After 14... ♗ad8?!

(14... ♘b8 the regrouping of the knight is preferable as it then can help defending the king's side.

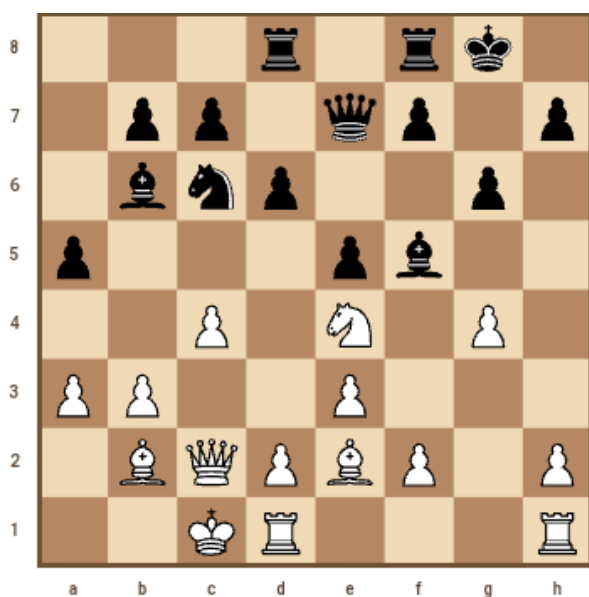

After 14... ♘b8

(19. Qc2 objectively better:)

After 19. Qc2

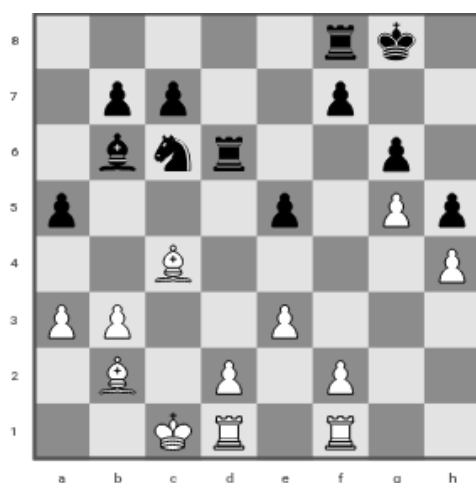

19... Qxd5 20. Qc4 Qd6 21. g5 Qe8

22... ♔f8 23. hxc6 hxc6 24. ♖h7 ♖d7 25.

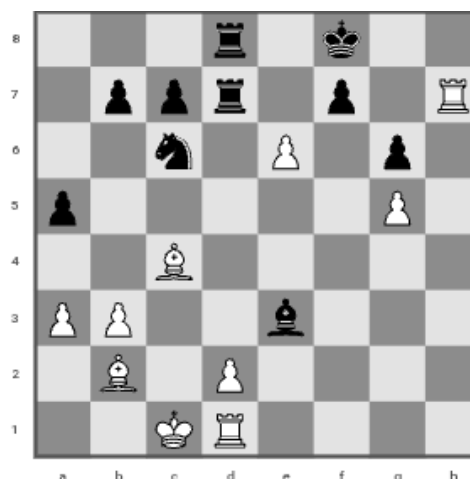

f4 ♖ed8 26. fxe5 ♗xe3 This move I calculated intensely before taking on e5 to make sure I don't mess up the winning position.

After 26... ♗xe3

(despite my calculations I didn't see this much clearer win: 27. e6!

After 27. e6!

After 13. ♙b1

(13. a3 Black has no good plan, so White should first put his pieces on optimal fields.

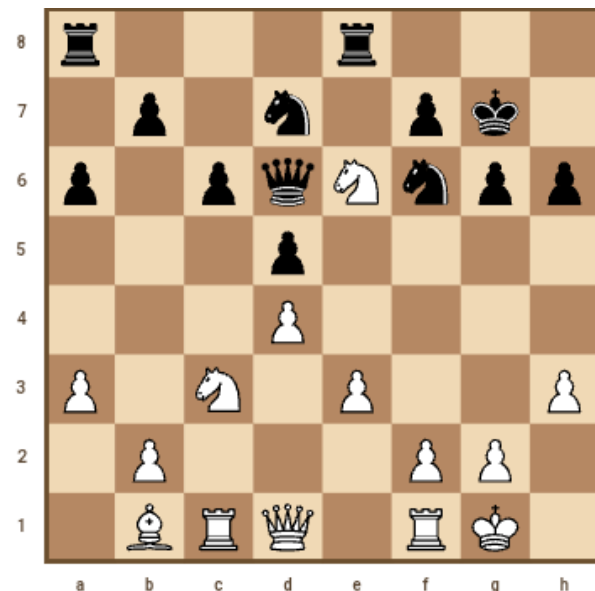

After 13. a3

g6 14. ♖e1 ♖ab8 15. ♙c2+=)

After 15. ♙c2+=

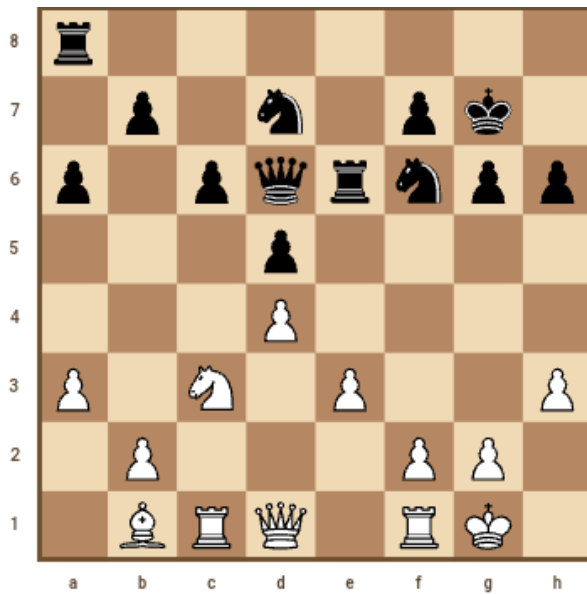

13... g6 14. a3 ♙g7 15. ♘g5 h6 16. ♘xe6+ that was my intention because I thought this bishop will become strong when center activities start, but it was a bad plan.

After 16. ♘xe6+

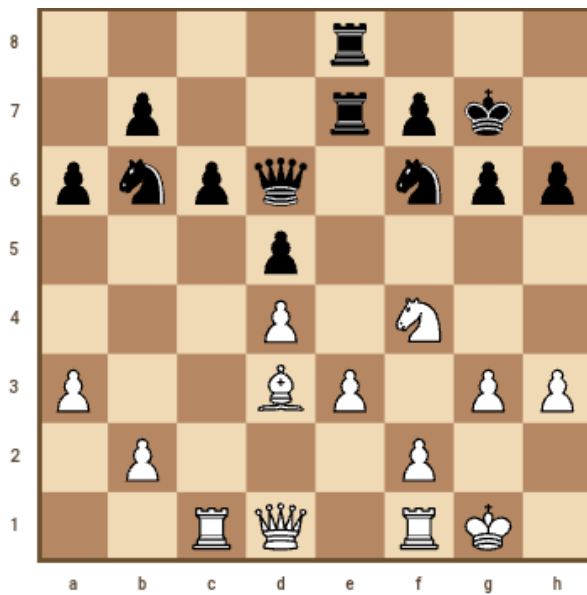

(better was just to return which gives away nothing 16. ♘f3)

16... ♖xe6= now, what did I achieve? Yes, nothing!

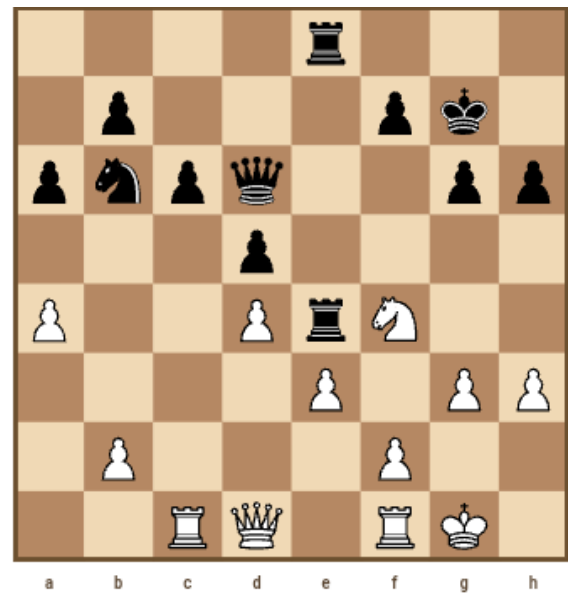

After 16... Rxe6=

17. Nxe2 Rxe8 18. Nf4 R6e7 19. g3 Nb6
20. Bd3 here we are again. Nc4 has to be

After 31. ♖c5=

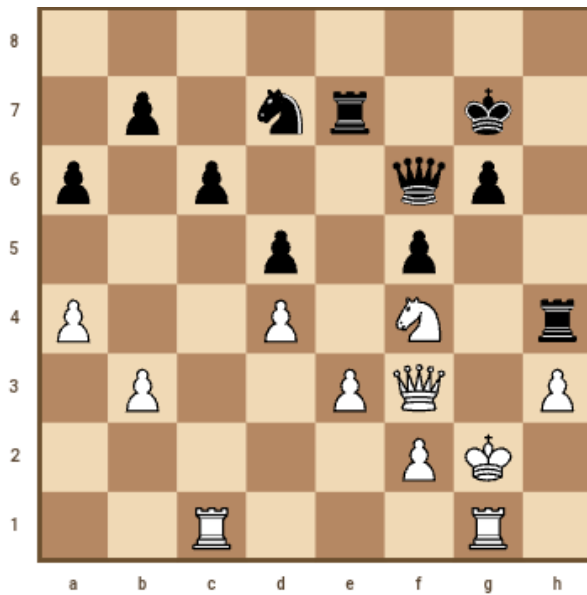

28. ♖g1+=

After 28. ♖g1+=

28... ♖xh4 29. ♞f4 I thought my attacking

After 29. Nf4

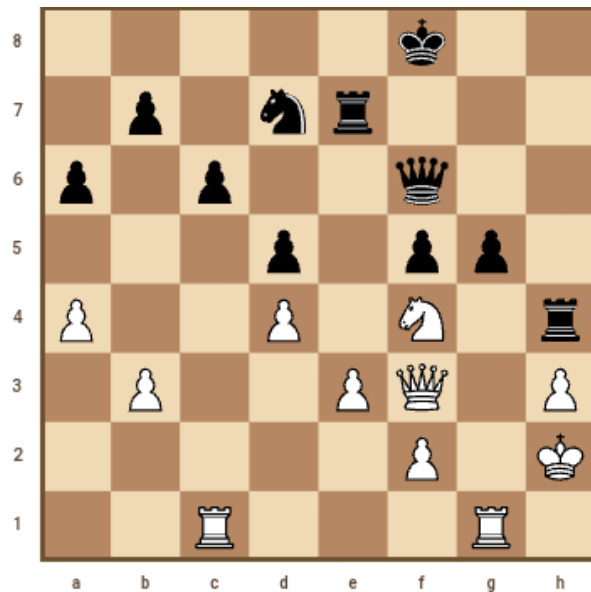

(objectively better was 29. b4 Nb6 30. b5
axb5 31. axb5 Nc4 32. bxc6)

29... Qf8?! looks logical to keep all options
but other moves were better like Qh6, Qh7,
Re4.

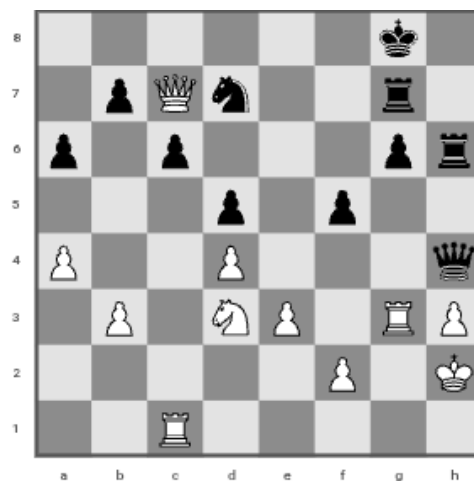

After 29... Qf8?!

30. Qh2 g5? I hoped for that because I saw
the following coming.

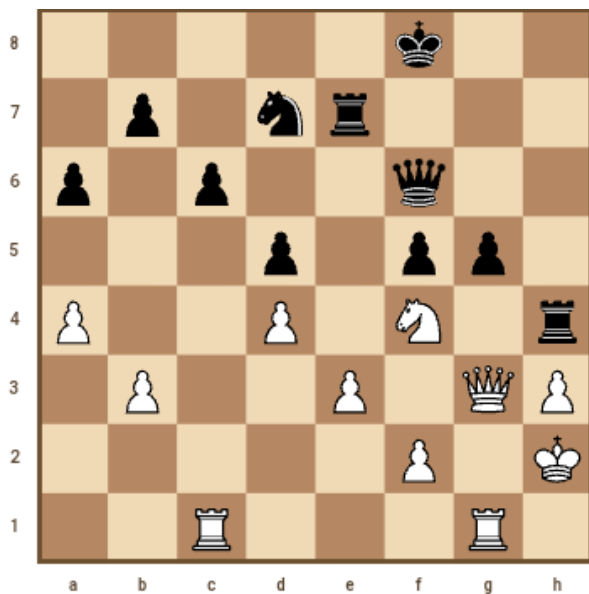

After 30... g5?

(better was 30... Rh6 31. Qg3 Rg7 32.
